

KC Binder Manager™

An 'End to End' Electronic Placement solution for managing Facilities, Binders, Lineslips, with seamless integration to existing transaction systems

As a comprehensive binder management solution KC Binder Manager captures and manages all declarations, endorsements and schedules and produces all attendant documentation. The workflow and business processes underpinning the system assists users to manage the cycle from initial enquiry to firm order including policy production and renewals. The reporting suite includes dynamic snapshots of premiums, brokerage performance as well as aggregations and exposures.

What does KC Binder Manager™ Deliver ?

- Removes the duplication of data entry across systems. Policy and risk data only needs to be captured once.
- Automation of Policy documentation is completed more efficiently and accurately. Changes to document formats e.g. LM Slip to MR Slip to GPD only requires a change to a single template.
- Accurate Aggregate Reporting facilitates a comprehensive range of Management Information.
- Firm Order and Formal Binder 'sign off' is automated and audited.
- Ease of access through Microsoft SharePoint, Outlook or Internet Explorer.
- A clear view of business volumes and values, by area, as well as accurate visibility to exposures and limits.
- Online quoting and rating enables new clients to be taken on more quickly and easily.
- Integration with back office systems for straight through processing.

Key Features

Operational Cost Reduction

Measurable saving of cost, time and effort from Enquiry to Firm Order

Compliance

With a structured, flexible, and auditable system; processes supporting the business operation relating to market initiatives such as MRC for Binders and Lineslips are supported, adhered to, and are immediately demonstrable with confidence.

Corporate Governance

With a single system managing the processing of Policies, corporate management receive a clear view of business volumes and values

Operational Agility

The solution is both robust and scalable so as to allow your entire business group, their partners and clients, to adapt to multiple markets.

Risk Management

An electronic placing application will allow Brokers, Agents and Underwriters to work on a single piece of business simultaneously, no matter where they are located.

Work/Life Balance

Clear management and ownership of risks. At any one time Brokers and Underwriters will have a transparent and accurate view of current workloads and deadlines.

Customer Service

By automating processes users will become more efficient, when managing the process from Quote or Firm Order for any given client.
